PROFESSIONAL SUMMARY

Third-year BS Computer Science student at the University of Santo Tomas, specializing in data science, and a consistent Dean's Lister. Experienced in building end-to-end digital solutions — from ETL pipelines and data warehouses to full-stack web and mobile applications. Driven by a passion for innovation and craftsmanship, with a track record of delivering clean, functional products in collaborative team settings. Actively seeking a software engineering or data internship where I can contribute fresh perspectives alongside seasoned professionals.

EDUCATION

BS Computer Science — Specialization in Data Science

Expected June 2027

University of Santo Tomas • Manila, Philippines • Consistent Dean's Lister

Relevant Coursework: Data Warehousing, Machine Learning, Software Engineering, Web Development, Mobile App Development

PROJECTS

ShopZada Data Warehouse

Dec 2025

Python • Pandas • PostgreSQL • Docker • Apache Airflow • Power BI

- Designed a full ETL pipeline for a multi-department e-commerce dataset as a Data Warehousing capstone, covering ingestion, transformation, and loading stages.
- Implemented a Kimball star schema with SCD Type 2 change tracking to preserve accurate historical records across all departments.
- Built Power BI dashboards surfacing business-ready KPIs; also architected the hybrid ETL pipeline and authored all data-cleaning scripts.

Sana.AI — 1st Place, UST CICS CodeWarts Hackathon

Next.js • Tailwind CSS • Python • Supabase

- Led a team of 4 to create a minimum viable product addressing opportunity inequality in the Philippines. The MVP won the team 1st place in the hackathon, focusing on creating better job access to informal workers that do not have formal work experience or “traditional credentials”.
- Implemented a machine learning algorithm using open-source models and fine-tuning it to better fit our data needs.
- Focused on delivering an intuitive user experience with reliable analytics.

Dolly's Closet — Fashion E-Commerce Website

2025

React.js • Tailwind CSS • Node.js • Supabase

- Developed a fully responsive e-commerce website for a local fashion brand, featuring a product catalog, filtering system, and a clean, on-brand UI.
- Implemented a Supabase-backed inventory and order management system with real-time updates and secure authentication.
- Focused on delivering an intuitive shopping experience across mobile and desktop, translating the brand's aesthetic into the digital interface.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML/CSS, Java, Rust

Databases & Cloud: PostgreSQL, MySQL, Supabase

DevOps: Docker, Apache Airflow, Kestra

Frameworks & Libraries: React.js, Node.js, Flutter, Tailwind CSS, Bootstrap, Scikit-learn, Pandas, NumPy, OpenAI

Tools: Figma, Git, Power BI, Matplotlib, Excel, Trello

ADDITIONAL INFORMATION

Organizations: TechDev Staff – UST CS Society | Media Staff – UST AWS Club

Hackathons: UST CICS Codewarts – 1st Placer | BPI Datawave 2025 | GCash ImaGnation 2025
